Auto Rotation Control Pro is in the tool category. You can check all apps from auto rotation control professional developers. The current price of this app is \$2.99. This app can be downloaded on Android 5.0+ on APKFab or Google Play. All APK.com XAPK files on APKFab are original and 100% safe with quick download. In our app, you can enable or disable android auto-rotate feature for individual apps. Some apps, such as YouTube, Netflix and gallery apps, benefit from automatic rotation, while others, such as browser apps, work best without it. By enabling or disabling Android auto-rotation in each app, you can seamlessly switch between them and enjoy using your smartphone without constantly having to change the settings yourself. This app does not rotate each app into portraits or landscapes. The General Misconceptions question «< some >> won't rotate even though Android's auto-rotate feature is enabled. Isn't this a malfunction of «< app» this is not a malfunction. This app does not force rotation. The app does not rotate because the individual rotation settings for the app are set to portrait fixed. In order to understand this app, you need to understand the automatic rotation function of Android and the mechanism of rotation of Android app. Each app has its own settings for rotation. Most apps are set to rotate vertically or horizontally (auto-rotate), but some apps are set to portrait pinning. Few apps are set to landscape fixed, but app developers can design them that way. There are requirements for the app to rotate vertically and horizontally freely. Android auto-rotate feature enabled 2. The app should be set to automatically rotate both portrait and landscape in individual settings If these two conditions are met at the same time, the app will rotate both vertically and horizontally. If Android's auto-rotate feature is disabled, the screen direction is fixed based on the rotation settings of each application. If the individual rotation settings for each application are Auto-Rotate or Vertically Fixed, the portrait is fixed and does not rotate horizontally. If the individual rotation settings for each application are Landscape Fixed, they are fixed horizontally and do not rotate vertically. And this app is an app that automatically enables and disables android auto rotation feature for each app. Features ► Android's auto-rotate feature in app settings is only enabled when the app specified here is running. You can see the features and operations of this app in a free trial. Please Features and operations by free trial before you buy. OPPO users] This app needs to run the service in the background to detect which app started. OPPO devices require special settings to operate app services in the background due to their unique specifications. (If you don't do this, services running in the background will be forced to terminate and the app won't work properly.) Drag this app a little below your recent app history and lock it. If you do not know how to set it up, search for OPPO Task Lock. Read more In our app, you can enable or disable android auto-rotate features for individual apps. Some apps, such as YouTube, Netflix and gallery apps, benefit from automatic rotation, while others, such as browser apps, work best without it. By enabling or disabling Android auto-rotation in each app, you can seamlessly switch between them and enjoy using your smartphone without constantly having to change the settings yourself.
